SUMMARY

Visual communication design student specializing in user experience, with hands-on experience across research, prototyping, accessibility auditing, and developer handoff. Blending culture, technology, and storytelling to create human-centered products for the communities they serve.

EXPERIENCE

ZEUX Innovation

UX Design Intern

On-site, Mumbai
May 2026 - August 2026

- **CIBIL:** Accessibility audits Audited the landing page, dashboard, and mobile app against WCAG 2.1 (A & AA) across Windows, Mac, Android, and iOS.
- Audited 83 PDFs in 1.5 weeks using manual review and AI-assisted triage.
- **Andhra Pradesh Grameena Bank:** Website and mobile banking redesign Ran stakeholder interviews and presented a playbook of three design directions each for web and mobile, securing client sign-off on a single direction.
- Delivered 65+ screens across 19 page types spanning the website, net banking, and mobile banking, keeping both platforms consistent.

Bazarghor

UI/UX Designer

Remote
September 2025 - February 2026

- Designed a grocery delivery app for small towns on a no-inventory model, starting with user research, competitor and SWOT analysis, and defined target audiences.
- Researched and ideated initial logo concepts to establish a relatable, culturally resonant brand identity.
- Built detailed information architecture, user flows, and wireframes into polished high-fidelity prototypes, then ran user testing to validate and refine the designs before developer handoff.

MentorMe

Visual Designer

Remote
May 2025 - July 2025

- Built a brand identity system from scratch, including logo, typography, and color palette, with guidelines to keep every asset consistent.
- Defined the brand's tone of voice and storytelling direction, so messaging held together across digital and print.
- Designed social media templates, business cards, and merchandise that gave the team a ready-to-use kit for ongoing marketing.

BuildMyStore

UI/UX Designer

Remote
March 2025 - May 2025

- Ran stakeholder research to pinpoint usability issues in the existing website and define clear redesign goals.
- Restructured user journeys and information architecture to make navigation clearer and support conversion.
- Designed a minimal, accessible interface that strengthened the brand's overall look and feel.

PROJECT

MythBusters

Global Game Jam

- Designed a board game in a 48-hour international game jam (theme: "Bubbles") that helps young girls in rural areas break common myths around menstruation.
- Combined educational content with engaging gameplay and culturally resonant visuals to make a sensitive topic approachable.
- Won recognition for innovation and social impact among participants from multiple countries.

Furnico

Kriti UI/UX Hackathon (NIT Patna & Des.Co)

- Designed a furniture shopping app with AR/VR features that lets users see products in their own space before buying.
- Built an immersive showroom experience that uses spatial visualization to help users with undefined needs and aesthetic preferences make purchase decisions.
- Placed 1st for innovation and practical implementation among competing design teams.

Khwaab

National Designathon

- Designed a dream journaling app in a 4-day national designathon, letting users log, reflect on, and visualize their dreams through a calm, immersive interface.
- Created the brand identity (logo, color palette, and typography) to reinforce the app's theme of mindfulness and emotional connection.
- Designed the navigation and microinteractions to keep the experience calm and easy to use.

EDUCATION

Bachelor of Design - Visual Communication

Karnavati University, Unitedworld Institute of Design (UID)

Gandhinagar, India
Expected Graduation: 2027

High School - CBSE

Amanora School

Pune, India
Graduated: 2023

AWARDS & HONORS

Winner, Global Game Jam 2025

Karnavati University • 2025

- Created MythBusters, a board game that breaks period taboos for young girls in rural areas through facts and interactive gameplay.

Winner, Kriti UI/UX Hackathon 2024

NIT Patna • 2024

- Designed Furnico, an AR-enabled furniture shopping app that helps users with undefined needs and aesthetic preferences shop with confidence.
